DETAILED ACTION

1. Claims 4,21,37, and 52 have been cancelled.
2. Claims 1,17,34, and 48 have been amended.
3. Claims 1-3,5-20,22-36,38-51, and 53-56 are pending.

Response to Arguments

4. Applicant's arguments filed on 08 August 2005 have been fully considered and they are persuasive.

Allowable Subject Matter

5. Claims 1-3,5-20,22-36,38-51, and 53-56 are allowed.
6. The following is an examiner's statement of reasons for allowance: The present invention is directed to a secure network and method of establishing communication amongst network devices that have restricted network connectivity. Each independent claim identifies the uniquely distinct feature "**each anti-bubble partition having no network connectivity to all other anti-bubble partitions within the same anti-bubble**", wherein the anti-bubble is two or more devices that have no network access or connectivity with each other. The closest prior art, Reid et al. (US Patent No. 6,182,226) discloses a network system wherein application-level gateways are used as a means for indirect communication between two different networks. However, Reid et al. fails to disclose a network where a region of the network has no network access or connectivity with another region of the network. Therefore, Reid et al. either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

7. Therefore, **claims 1,17,34, and 48** and the respective **dependent claims 2-3,5-16,18-20,22-33,35-36,38-47,49-51, and 53-56** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
